

ISECON, the Information Systems Education Conference, brings together Information Systems educators from around the world. ISECON has been held annually since 1982 and is the largest continuously running conference for IS education. This is the place to learn about and contribute to the latest trends and issues in the field, such as model curricula, program accreditation, and emerging technologies. Activities include workshops and seminars conducted by experts, distinguished guest speakers, panel sessions, refereed paper sessions, and an active vendor exhibits area. These Proceedings include all papers presented at the conference together with pictures, slides, and other ancillary materials provided by the authors.
