Abstract

Join us for this opportunity to review the papers process employed in 2005. This includes a critique of the automated system, assigning papers to all authors, the evaluation form, process and timing. Help build the process for the 2006 ISECON Conference. What did we do right? What can we do better? All 2005 Reviewers, super reviewers, track chairs, authors and potential authors and reviewers for the 2006 Conference are welcome.
